# What's Different About ChatGPT?

---

The screenshot displays the ChatGPT interface with three columns: Examples, Capabilities, and Limitations. At the bottom, there is a text input field and a disclaimer.

Examples	Capabilities	Limitations
"Explain quantum computing in simple terms" →	Remembers what user said earlier in the conversation	May occasionally generate incorrect information
"Got any creative ideas for a 10 year old's birthday?" →	Allows user to provide follow-up corrections	May occasionally produce harmful instructions or biased content
"How do I make an HTTP request in Javascript?" →	Trained to decline inappropriate requests	Limited knowledge of world and events after 2021

# Meet Max, An AI Assistant for Analytics

**Max** Monday 9:00am  
Hi Sam, what can I help you analyze today?

**Sam** Monday 9:03am  
What's my mobile conversion rate?

**Max** Friday 9:03am  
So far this year, your average mobile conversion rate is 3.2%. This is down 1.7% from last year, driven by fewer conversions from Android users.

**Danielle** Friday 2:20pm  
How are sales this month?

**Max** Friday 2:20pm  
Sales were \$1.5 million, up 20% versus the same time last year. The growth was driven by sales of Sweaters. There was a noticeable spike observed on December 12th.

**Analyze Android users**

**Examine the Dec. 12 spike** **Drill down into sweater sales**

- Available whenever you need
- Connected to your data
- Skilled in advanced analytics
- Spins raw data and facts into insightful narratives

# Ask Questions, Get More Complete Answers

Ask questions about your business performance

Danielle

How is my brand doing this month?
